

## **“My classroom plays sustainably”**

### **1<sup>st</sup> SAME WORLD European Contest for Good Practices on Environmental Sustainability Education**

In February 2017 the SAME WORLD project announced the 1<sup>st</sup> European contest for Good Practices on Environmental Sustainability Education “My classroom plays sustainably”. The contest aims at identifying and highlighting good educational practices which focus on environmental and sustainability topics on the ground of formal education systems in Europe.

The contest call has been announced in 9 European countries, addressing secondary education teachers from all over Europe. Teachers who had implemented Environmental Sustainability Education (including Global Citizenship Education) practices with their secondary school students within the last 3 years (school years 2014-2015, 2015-2016 and 2016-2017) have been invited to participate and submit their education practices.

The SAME WORLD contest was held on two levels:

- a) On a local/national level, which aimed at selecting the best three practices that were translated in English so as to participate on the European contest
- b) On a European level, which aimed at selecting the Best Environmental Sustainability Education Practice out of the best national practices submitted and thus award 1<sup>st</sup> prize to the winning participant

A total of **112 good practices on Environmental Sustainability Education** have been submitted in the frame of the national contests, 26 of which have been selected to participate in the European level.

All 26 best national practices have been evaluated by the European Evaluation Committee (EEC) of the contest, consisting of the 5 members of the SAME Scientific Board and 9 partners' representatives (one of each participating country).

The practice that won the **1<sup>st</sup> place** and the title of **Best Practice on Environmental Sustainability Education** is the following:

**“Migration over the Aegean Sea - Humanity Endangered”**  
implemented in the 1<sup>st</sup> High School of Metamorfofis (Greece).

The winning participants (teachers and students) have been awarded the Grand Prize of the contest, which is a full covered trip to Sintra, Portugal, in October 2017, including the participation in the 3<sup>rd</sup> SAME WORLD International Exchange.
